

LIST OF FIGURES

1.1.1	Untreated caries prevalence by gender and age group	4
1.1.2	Untreated caries prevalence by federal poverty level and race/ethnicity by age group	4
1.1.3	Untreated caries prevalence by education and age group	5
1.2.1	Decayed, missing, and filled surfaces in permanent teeth (DMFS) by age group (ages 6-8, 12-15, and 35-44 years) and gender	8
1.2.2	Decayed, missing, and filled surfaces in permanent teeth (DMFS) by age group (ages 6-8, 12-15, and 35-44 years) and race/ethnicity	8
1.2.3	Decayed, missing, and filled surfaces in permanent teeth (DMFS) by age group (ages 6-8, 12-15, and 35-44 years) and federal poverty level	9
1.2.4	Decayed and filled surfaces in primary teeth (dfs) by age group (ages 2-4 and 6-8 years) and gender	9
1.2.5	Decayed and filled surfaces in primary teeth (dfs) by age group (ages 2-4 and 6-8 years) and race/ethnicity	10
1.2.6	Decayed and filled surfaces in primary teeth (dfs) by age group (ages 2-4 and 6-8 years) and federal poverty level	10
1.3.1A	Trends in primary dentition untreated dental caries prevalence by age group	12
1.3.1B	Trends in primary dentition untreated dental caries prevalence by age group and gender	12
1.3.1C	Trends in primary dentition untreated dental caries prevalence by age group and race/ethnicity	12
1.3.1D	Trends in primary dentition untreated dental caries prevalence by age group and federal poverty level	12
1.3.2A	Trends in permanent dentition untreated dental caries prevalence by age group	13
1.3.2B	Trends in permanent dentition untreated dental caries prevalence by age group and gender	13
1.3.2C	Trends in permanent dentition untreated dental caries prevalence by age group and race/ethnicity	13
1.3.2D	Trends in permanent dentition untreated dental caries prevalence by age group and federal poverty level	13

LIST OF FIGURES

2.1.1	Percentage of children with dental sealants on 1st or 2nd molars by age group, race/ethnicity, and federal poverty level.	18
2.1.2	Percentage of children with dental sealants on 1st or 2nd molars by age group, race/ethnicity, and federal poverty level.	18
2.2.1	Fluoridation growth by population in the United States.	19
2.2.2A	Percentage of U.S. population on public water systems	20
2.2.2B	Percentage of U.S. population on public water systems receiving fluoridated water	20
2.2.3	Percentage of population receiving fluoridated water through public water systems—10 highest and 10 lowest states, 2000.	20
3.1.1	Prevalence of gingival bleeding among adults aged 20 and older by selected demographic characteristics	23
3.2.1	Prevalence of loss of attachment of 4 mm or more among adults aged 20 and older by age and race/ethnicity	26
3.2.2	Prevalence of loss of attachment of 4 mm or more among adults aged 20 and older by selected characteristics	26
4.1.1	Percentage of adults aged 18 and older with full dentition by demographic variables	29
4.1.2	Percentage of adults aged 18 and older with full dentition by race/ethnicity and federal poverty level.	30
4.1.3	Percentage of adults aged 18 and older with full dentition by annual family income	30
4.2.1	Percentage of adults aged 20 and older with 21 or more teeth by age and race/ethnicity	32
4.2.2	Percentage of adults aged 50 and older with 21 or more teeth by education.	32
4.2.3	Percentage of adults aged 50 and older with 21 or more teeth by race/ethnicity and federal poverty level	33
4.3.1	Prevalence of edentulism by selected demographic characteristics.	36
4.3.2	Prevalence of edentulism by annual family income and age	36
4.4.1	Prevalence of denture use among edentulous adults by race/ethnicity, federal poverty level, and education	37

LIST OF FIGURES

5.1.1	Percentage of adults aged 18 and older with a self-assessed oral health status of good or better by race/ethnicity, federal poverty level, and education.	40
5.1.2	Percentage of adults aged 18 and older with a self-assessed oral health status of good or better by smoking status and dental visits.	40
6.1.1	Prevalence of oral infections and benign lesions by race/ethnicity among adults aged 18 and older	43
6.1.2	Prevalence of oral infections and benign lesions by education among adults aged 18 and older	43
7.1.1	Percentage of the U.S. population that visited a dentist within the past year by age group.	48
7.1.2	Percentage of the U.S. population that visited a dentist within the past year by selected demographics	48
7.3.1	Percentage of children aged 18 years and younger who received preventive dental services during 1997 by type of service and federal poverty level	52
7.3.2	Percentage of children aged 18 years and younger who received any preventive dental services during 1997 by race/ethnicity and federal poverty level	52
7.3.3	Percentage of children aged 18 years and younger who received any preventive dental services during 1997 by insurance status and federal poverty level	53
7.4.1	Percentage of schools that provided oral health screening	56
7.5.1	Percentage of community-based health centers offering various types of dental care services on-site, 2001	58
7.5.2	Employment status of dental employees at community-based health centers . . .	58
7.6.1	Map of states with full-time dental directors, 2000	59
7.7.1	Percentage of adults with a usual source of dental care by age, 1971-1975.	62
7.7.2	Percentage of adults with a usual source of dental care by selected demographics, 1971-1975	62
7.8.1	Percentage of the population who received preventive dental services during 1997 by type of service and race/ethnicity	64
7.8.2	Percentage of the population who received preventive dental services during 1997 by type of service and federal poverty level	64

LIST OF FIGURES

7.8.3	Percentage of the population who received preventive dental services during 1997 by type of service and insurance status	65
7.9.1	Percentage of adults who did not visit a dentist within the past 12 months due to cost by age	67
7.9.2	Percentage of adults who did not visit a dentist within the past 12 months due to cost by gender	68
7.9.3	Percentage of adults who did not visit a dentist within the past 12 months due to cost by income	68
9.1.1	Prevalence of congenital malformations by race/ethnicity	78
10.1.1	Percentage of adults aged 20 and older with chronic orofacial pain by age group	82
10.1.2	Percentage of adults aged 20 and older with chronic orofacial pain by gender.	82
10.1.3	Percentage of adults aged 20 and older with jaw joint pain by race/ethnicity and federal poverty level	83
10.2.1	Percentage of adults aged 20 and older with acute orofacial pain by age group	86
10.2.2	Percentage of adults aged 20 and older with tooth pain by race/ethnicity, federal poverty level and education.	86
10.2.3	Percentage of adults aged 20 and older with mouth sores by race/ethnicity and education	87
11.1.1	Craniofacial injuries among emergency room visits by selected demographic characteristics	90
12.1.1	Smokeless tobacco lesions among 12- to 17-year-olds by selected demographic characteristics	94
12.1.2	Smokeless tobacco lesions among adults aged 18 and older by selected demographic characteristics.	94
12.2.1	Trends in prevalence of current cigarette smoking among U.S. high school students by race/ethnicity	96
12.2.2	Trends in prevalence of current cigarette smoking among U.S. high school students by gender	97
12.2.3	Trends in prevalence of current cigarette smoking among U.S. adults	97

LIST OF FIGURES

13.1.1	Incidence rates for oral and pharyngeal cancers (1992-1997)	101
13.1.2	Incidence rates for oral and pharyngeal cancers (1992-1997) by stage at diagnosis and race/ethnicity.	102
13.1.3	Incidence rates for oral and pharyngeal cancers (1992-1997) by stage at diagnosis and gender	102
13.1.4	Incidence rates for oral and pharyngeal cancers (1992-1997) by age group	103
13.2.1	Percentage of adults aged 40 and older who reported having had an oral cancer examination in the past year.	106
13.2.2	Trends in percentage of adults aged 40 and older who reported having had an oral cancer examination in the past year by race/ethnicity.	107
13.3.1	Oral and pharyngeal cancer deaths (per 100,000) in 1998 by race/ethnicity, gender, and education	110
13.4.1	Incidence rates for oral and pharyngeal cancers by sites	112
13.4.2	Incidence rates for oral and pharyngeal cancers by site and stage at diagnosis	112
13.4.3	Incidence rates for oral and pharyngeal cancers by site and race.	113
13.4.4	Incidence rates for oral and pharyngeal cancers by site and gender	113
14.1.1	Prevalence of reported xerostomia among subjects aged 20 to 80 years by number of medications taken	117
15.1.1	Percentage of persons with diabetes among adults aged 30 and older by age group and race/ethnicity	122
15.2.1	Percentage of dentate adults aged 50 and older with and without diabetes who visited a dentist within the past year by race/ethnicity and gender.	123
15.2.2	Percentage of dentate adults aged 50 and older with and without diabetes who visited a dentist within the past year by federal poverty level and education.	124
15.4.1	Prevalence of osteoporosis per 100 persons aged 45 and older by race/ethnicity and education	128
16.1.1	Insurance coverage among adults aged 18 and older by age	132
16.1.2	Insurance coverage among adults aged 18 and older by selected demographic characteristics	132

LIST OF FIGURES

16.1.3	Insurance coverage among adults aged 18 and older by annual family income . .	133
16.2.1	Trends in annual per capita costs for dental services by year and source of payment, 1960-1999	136
16.2.2	Mean annual dental care expense by age group and source of payment, 1977, 1987, and 1996	136
16.2.3	Mean annual dental care expense by race/ethnicity and source of payment, 1977, 1987, and 1996	137
16.2.4	Mean annual dental care expense by source of payment and federal poverty level, 1977, 1987, and 1996	138
16.3.1	Trends in annual payment for dental services by year and source of payment, 1960-1999	140
16.3.2	Trends in annual payment for dental services by age and source of payment, 1977, 1987, and 1996	140
16.3.3	Trends in annual payment for dental services by race/ethnicity and source of payment, 1977, 1987, and 1996	141
16.3.4	Trends in annual payment for dental services by federal poverty level and source of payment, 1977, 1987, and 1996	142
16.5.1	Number of dentists and physicians per 100,000 population in 1998 by state . .	146
16.5.2	Estimates of numbers of dentists by state	149
17.1.1	Mean work hours lost due to dental visits or oral health problems per 100 employed persons	156
17.1.2	Mean number of work hours missed by those with missed hours due to a dental visit or oral health problem	157
17.1.3	Mean school hours lost due to a dental visit or oral health problem per 100 school-aged children	157
17.1.4	Mean school hours lost due to dental visit or oral health problem per 100 school-aged children among those with missed hours	158
